NORTH CAROLINA AGRICULTURAL STATISTICS

OCT 21 1982

1982

Office Of
THE COMMISSIONER OF AGRICULTURE
Raleigh, North Carolina

Agriculture in the Tar Heel state has always been recognized as the mainstay of our economy. We have been blessed with abundant outturns in production in recent years. Our farmers produce the best crops and livestock in the country. Nevertheless, we are facing a crossroads in North Carolina agriculture because of high costs of production and high interest rates. Because of our heritage and our know how, I am confident we will survive these perilous times but we must keep abreast of what is happening in agriculture here in North Carolina and across this great Nation.

Marketing continues to be of high priority and we here at the North Carolina Department of Agriculture are ready to assist our producers in every way possible. In times like this, it is important to have accurate data and dependable information. This timely information is available to you and provided by the North Carolina Department of Agriculture to assist in making vital management decisions. Included in this publication are state and county statistics on all agricultural commodities produced in North Carolina. The Crop and Livestock Reporting Service Division has compiled these data from information provided by farmers who have voluntarily supplied data relative to their individual farms. Survey results provide the basis for sound and reliable estimates for county and state totals.

This copy of North Carolina Agricultural Statistics is provided by NCDA as a public service. Gratitude is expressed to the many farmers and other agri-business reporters who supply the data necessary for these estimates.

A handwritten signature in dark ink that reads "James A. Graham". The signature is fluid and cursive, with the first letters of the first and last names being capitalized and prominent.

JAMES A. GRAHAM
Commissioner of Agriculture

Raleigh, N. C. 27611
Phone (919) 755-4394

Dear Readers,

Having been in North Carolina for only a year, it has been a privilege to become acquainted with the State's vast agricultural resources. The diversity of production from the eastern shore regions spreading across the Piedmont to the mountains and beyond in the west is amazing.

Cash farm income reached over 4.2 billion dollars in 1981 in this State, a gain of 61 percent in 5 years. In 1977, the total was 2.6 billion. Tobacco, at 1.3 billion dollars in 1981 contributed 31 percent of the total with the poultry and egg industry at 832 million providing 20 percent. Hogs with over 8 percent, soybeans at 7 percent, corn and dairy products both at 6 percent, forest products at 5 percent, and vegetables and peanuts both at 4 percent provided the majority of the balance in 1981. Even though cash receipts are up substantially, net farm income has not improved. High operating costs continue to plague our farmers. Thus, it is important that this office continues to provide accurate information on North Carolina agriculture to assist farmers, policymakers and the agribusiness community in making sound management decisions.

The value and magnitude of agriculture's contribution to the economy of North Carolina is portrayed by the information in this publication. The assistance and voluntary cooperation of reporters throughout the State is much appreciated and makes this publication possible. In addition, the corps of enumerators who collect the data along with the office staff are to be commended for their dedication. Lastly, I want to say that this work would not be possible without the support and encouragement from Commissioner Graham and his able staff. Within the framework of his charter, it is possible to provide this service.

James L. Olson
Statistician In Charge

NORTH CAROLINA'S RANK IN THE NATION'S AGRICULTURE, 1981

COMMODITY	Rank Among States	Production	Unit	Percent of U.S. Production
Flue-Cured Tobacco Production	1	756,305	(000 Lbs.)	64.6
Total Tobacco Production	1	796,840	(000 Lbs.)	38.7

Hay Production	38	636	(000 Tons)	.4

WEATHER AND CROPS SUMMARY FOR 1981

WEATHER AND CROPS ROUND UP

Farmers across the Tar Heel state were severely tested in 1981 when the year began with a drought which continued well into the summer. Field conditions remained dry throughout the spring pushing planting progress of most crops well ahead of schedule. However, the development of all crops was slow throughout the period and plantings began to show severe stress by the first of June. As of June 1, soil moisture was short to adequate with most field crops maintaining a fair to good condition. Some localities had begun to receive timely rainfall by this date.

After June 1, soil moisture supplies began to increase slightly and the condition of most crops improved. Disease levels and insect infestations stayed at fairly low levels for the time of year and weed control was no problem. By mid-month, moisture levels started to drop once again and temperatures soared to hot, summertime levels. Temperatures averaged well above normal during June with several localities recording around 100 degrees or better. Tobacco harvest was underway by month's end and the harvest of peaches and small grains continued into the month of July.

The month of July began on a positive note with timely and substantial rains occurring across the entire state. The moisture was received at a very critical stage for the proper development of several crops, especially corn. Flue-cured tobacco and vegetable harvests were the primary farm activities during the month and both carried well into the month of August.

Soil moisture remained at about the same levels into the month of August, but showers had begun to occur on a more regular basis. Burley tobacco harvest had geared up by the middle of the month along with corn for silage and apples. Yields for most crops appeared to be at least normal or better with the apple and peach crops being off just slightly. By month's end, crops which remained to be harvested were reported to be in mostly good condition.

Weather conditions were fairly normal during the month of September except for some below normal temperature readings toward month's end. Many harvest activities had surged toward completion by mid-September and the combining of corn for grain was about half finished. Sweet potato harvest geared up toward the end of September and many growers had begun preparing land for fall seeding. The state's soybean crop was in mostly good condition as of September 27 with about 8% of the acreage having shed leaves.

The month of October began with declining soil moisture supplies once again and near normal temperatures. Peanut digging and cotton picking got well underway at the first of the month while planting of fall cover crops also gained momentum. November gave farmers a wide variation in temperatures but a decline in precipitation. Harvest of nearly all crops had neared completion by the end of the month. Temperatures averaged below normal during December with farmers winding down all activities and closing shop for the winter.

FLUE-CURED CROP UP SLIGHTLY

The 1981 flue-cured tobacco crop in North Carolina totaled 756.3 million pounds, up 2% from the 1980 production of 744.7 million pounds. The yield per acre averaged 2,145 pounds, 155 pounds more than the 1980 average of 1,990 pounds. The acreage harvested, at 353,000 acres, was down 6% from the 374,000 acres harvested in 1980.

The value of the crop totaled \$1.3 billion, up 16% from the previous year's crop. The season average price was \$1.673 per pound compared with \$1.463 in 1980.

CORN CROP UP 36%

Production of corn for grain in North Carolina in 1981 is estimated at 140.9 million bushels. This is 36% more than the 1980 drought stricken crop of 103.8 million bushels. The production was harvested from 1,830,000 acres, up 6% from the 1,730,000 acres harvested for grain in 1980. The average yield per acre was 77 bushels, 17 bushels more than the previous year's average of 60 bushels.

The State's corn crop was valued at \$380 million, 8% more than the year earlier crop because of larger production. The season average price at \$2.70 per bushel was down \$.68 per bushel from the previous year's average of \$3.38.

SOYBEAN PRODUCTION RECORD HIGH

Soybean production in North Carolina in 1981 is estimated at a record high 47 million bushels, up 35% from the 1980 crop of 34.7 million bushels. Higher yields per acre more than offset a decrease in acreage harvested to result in the record high crop. The yield per acre averaged 25 bushels, 7 bushels more than the year earlier average of 18 bushels. The acreage harvested in 1981 is estimated at 1,880,000, down 3% from 1980.

The value of production is placed at \$289 million, 6% more than the 1980 value of \$272 million. The season average price was \$6.15 compared with \$7.83 for the 1980 crop.

BURLEY TOBACCO CROP INCREASES

North Carolina's 1981 burley tobacco production was estimated at 27.8 million pounds, a sharp 64% increase over the previous year's total. The yield averaged 2,550 pounds per acre, up 625 pounds from 1980. Harvested acreage at 10,900 was up 2,100 acres from the previous crop year.

The 1980 crop was valued at \$49.8 million, 77% higher than the value of the 1980 crop.

PEANUT CROP RECORD HIGH

The 1981 North Carolina peanut crop totaled a record high 562 million pounds, almost double the previous year's drought reduced production of 291 million pounds. This increased production occurred due to a larger acreage for harvest and a much higher yield. The yield in 1981 averaged a record high 3,175 pounds, up 1,420 pounds from the previous year. Harvested acreage at 177,000 was up 11,000 acres from 1980.

The season's average price was \$.280 per pound, an increase of 24% over the previous year. The 1981 value of production at \$157.4 million was more than double the 1980 value.

YAM PRODUCTION LARGER

Sweet potato production in North Carolina was estimated at 4,680,000 cwt. during the 1981 crop year. This was an increase of 10% over the previous year, but 2% lower than 1979's production. The yield per acre was up 5 cwt. from the previous year at 120 cwt. while harvested acreage was up 2,000 acres at 39,000. The 1981 season's average price was \$13.80 per cwt, an increase of \$.40 over 1980. The value of production was \$65 million, 13% higher than the previous year.

APPLE AND PEACH PRODUCTION DOWN

Tar Heel commercial apple production totaled 375 million pounds in 1981, down 9% from the 1980 production of 410 million pounds. The 1981 production was the second highest on record, surpassed only by the previous year.

Peach production totaled 40 million pounds during 1981, down 11% from the previous year's production of 45 million pounds. This peach crop was the lowest recorded in North Carolina since 1977.

COTTON CROP UP SHARPLY

Cotton production in North Carolina totaled 95,000 bales in 1981, a sharp increase of 83% from the 1980 production. This increase was attributed to both increases in acreage and yield. Yield per acre averaged a record high 558 pounds, up 177 pounds from the previous year. Harvested acreage was up 26% at 82,000 acres.

Cotton lint was valued at \$26.4 million, up 33% from 1980. The season's average price at \$.580 per pound was down 27% from the previous year. The value of cottonseed was about \$2.8 million in 1981 with a season's average price of \$.83 per ton.

LIVESTOCK, DAIRY & POULTRY REVIEW OF 1981

CASH RECEIPTS UP

Cash receipts from livestock, dairy and poultry products totaled \$1.6 billion in 1981, up 10% from 1980. All poultry products combined accounted for \$832 million while income from broilers alone amounted to \$468 million or 30% of the total. Cash receipts from hogs at \$358 million and 23% of the total was up 13% from the previous year. Wholesale milk cash receipts at \$234 million rose 9% from 1980. Income from turkeys rose 10% to a total of \$178 million. Eggs produced during 1981 brought in \$173 million—1% below 1980. Income from cattle and calves increased to \$119 million, up 5% from the previous year.

BROILER RECORD HIGH

Broiler production in North Carolina reached a new record high during 1981 at 423 million birds, an increase of 6% from last year's record high. Meat production increased 9% to 1.7 billion pounds.

The average price of 27.0 cents per pound for broilers rose 6% and yielded a gross income of \$468 million for the state, up 15% from the previous year.

Income from broilers is the largest contributor to cash receipts for the livestock and poultry commodity group making up about 30% of the income for this group. North Carolina ranks fourth nationally in total broiler production.

HOG NUMBERS DECLINE

The December 1, 1981 inventory of hogs and pigs on North Carolina farms showed an annual decrease of 20% to 1,980,000 head. The state continues to rank seventh nationally in total hog numbers. Farrowings were down 18% to 455,000 in 1981 for an average of 7.55 pigs per litter, about three tenths of a pig higher than the 1980 average. A crop of 3,436,000 pigs was produced in the state, 621,000 or 15% fewer than the preceding year.

Hog marketing at 3,634,000 head decreased 6% during 1981. Although marketings were down, the 17% increase in the average price at \$44.00 cwt, resulted in a 13% increase in cash receipts to \$358 million for the state. The value of home consumption at 13.1 million was down 7% from a year earlier.

MILK PRODUCTION UP

Milk production in North Carolina during 1981 totaled 1.7 billion pounds, up 1% from 1980. The number of milk cows at 134,000 head remained unchanged. Milk output per cow at 12,343 pounds increased 1% from the previous year.

Cash receipts from sales of milk and cream totaled \$240 million, up 9% from a year earlier. The total value of milk produced was up 9% to \$251 million. Fluid milk prices rose 7% from 1980 to \$15.16 cwt.

FIRST IN TURKEYS

North Carolina overtook Minnesota as the number one turkey producing state during 1981. A record high 26.8 million turkeys were produced in North Carolina during the year, up 11% from the previous year's record high number. The total pounds of meat produced, at 469 million increased 16% from last year. Live weight average price per pound was 38.0 cents, down 5% but yielded a gross income of \$178 million, up 10% from 1980.

EGG PRODUCTION DOWN

Commercial egg production in North Carolina during 1981 totaled 3.1 billion, down 3% from the previous year. The average number of layers on hand was 12.9 million, down 2% from 1980. Egg production per layer decreased 1% from the previous year to the level of 238 eggs.

Cash receipts from sales during 1981 amounted to \$173 million, down 1% from the previous year. The average price per dozen was 67.9 cents, up 2% from 1980. The state is ranked number 8 nationally in cash receipts from eggs.

CATTLE MARKETING INCREASE

Cash receipts from cattle and calves in the state increased 5% in 1981 to a total of \$119 million. A larger number of cattle marketed more than offset the reduced average prices received of \$44.90 cwt. for cattle and \$55.20 cwt. for calves causing the increase. The value of home consumption of cattle and calves dropped 1% in 1981 to \$17 million.

The inventory of cattle and calves on Tar Heel farms as of January 1, 1982 was 1.2 million head, unchanged from January 1, 1981. Calf births showed a 2% decline during the year at 480,000 head. Calf marketing increased 25% to 206,000 head while cattle marketing increased 22% to 225,000 head.

SHEEP AND LAMBS INCOME DOWN

Marketing of sheep and lambs was 12% below the previous year and the decrease in prices resulted in a 19% decrease in cash receipts for the year to \$122,000.

The number of sheep and lambs in North Carolina at 7,700 head as of January 1, 1982 was up 3% from a year earlier. The lamb crop was down 12% at 5,600 head for the year.

STATISTICAL REPORTS PROGRAM

NORTH CAROLINA AGRICULTURAL STATISTICS brings together the current and historic statistics concerning agriculture in the State. Where possible, types of information most often requested by farmers, the general public, and workers in government agencies are included.

Reporting of crop and livestock statistics is a service rendered to farmers and others in the State by the Statistical Reporting Service of the U. S. Department of Agriculture in cooperation with the North Carolina Department of Agriculture.

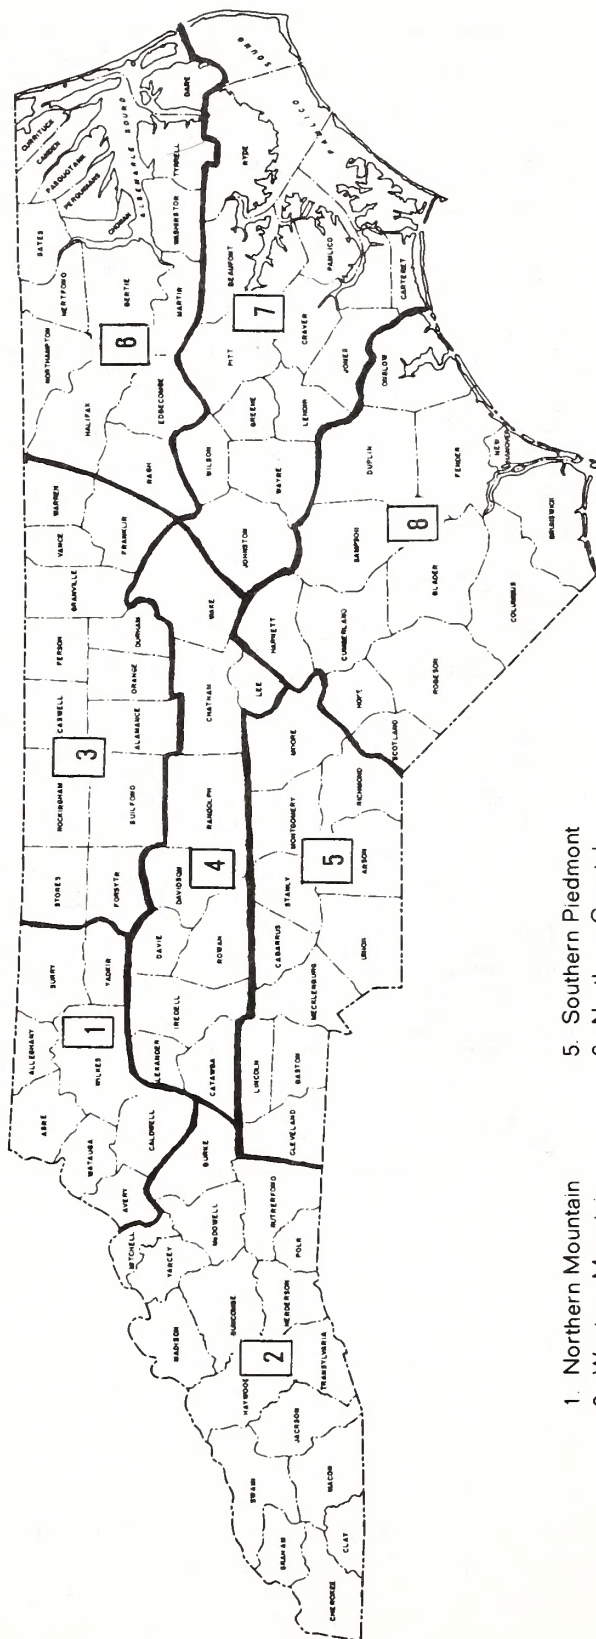

The collection and dissemination of agricultural statistics had its start in 1863. This is one of the oldest activities of the United States Department of Agriculture. It was recognized that there were many advantages of a joint relationship between the State and Federal Governments in the development of agricultural statistics. Thus, in 1919 the N. C. Department of Agriculture entered into a cooperative agreement with the U. S. Department of Agriculture to provide detailed agricultural statistics. The agreement resulted in the creation of the Crop and Livestock Reporting Service Division of the North Carolina Department of Agriculture.

The North Carolina Crop and Livestock Reporting Service publishes official statistics on crops, livestock, prices, and various other agricultural items. A list of the most important reports and the approximate dates of release is shown in the table at the right. Those reports not marked with an (*) are included in the semi-monthly release entitled "Farm Report". There is a nominal charge for these reports, which are available by writing to:

Agricultural Statistician
P.O. Box 27767
Raleigh, NC 27611

TYPE OF REPORTS	FREQUENCY OF REPORT	APPROXIMATE DATE AVAILABLE
I. CROP REPORTS		
1. Intentions to plant	Annually	Feb. 18
2. Production of Field Crops, Fruits & Vegetables	Monthly (In Season)	10-12th
3. Grain Stocks (All Positions)	Quarterly	25th of Jan., Apr., Jun., Sept., Oct.
4. Annual Crop Summaries Small Grains Other Field Crops	Annually Annually	December 20 January 15
II. WEATHER-CROPS REPORTS	Weekly	Monday - 3:00 P.M.
III. LIVESTOCK REPORTS		
1. Cattle & Milk Cow Inventory, Jan. 1	Annually	January 30
2. Calf Crop	Annually	January 30
3. Pig Crop & Hog Inventory	Quarterly	20th of Mar., Jun., Sept., Dec.
4. Commercial Slaughter	Quarterly	22nd of Jan., Apr., July, Oct.
5. Meat Animals - Farm Production, Disposition & Income	Annually	April 1
IV. DAIRY REPORTS		
1. Cows Milked & Milk Production	Quarterly	Mid Jan., Apr., July, Oct.
2. N. C. Dairy Report	Semi-Annually*	Mar. 1, Sept. 1
3. Milk Production & Disposition	Annually	May 24
V. POULTRY REPORTS		
1. Poultry Inventory Dec. 1	Annually	January 30
2. Eggs, Chickens, Turkeys & Hatchery;	Quarterly	22nd of Mar., Jun., Sept., Dec.
3. Broilers Placed, Eggs Set and Hatched	Weekly*	Wednesday-P.M.
4. Turkeys Raised	Twice Per Year	Aug. 20, Jan. 10
5. Turkey Breeder Hens	Twice Per year	Sept. 20, Jan. 10
6. Poultry Production, Disposition, & Income	Annually*	April 8
VI. PRICE REPORTS		
1. Prices Received By Farmers	Monthly	30th
2. Prices Paid By Farmers	Monthly	30th
